Meeting Schedule ::

Frequency

daily

Duration

5 - 15 minutes

Objective ::

Checklist

1. Short report about progress

2. Assign new tasks
3. Create new tasks as new issues in the board
 - 3.1 Decompose tasks into small sub-issues such that every can be finished in one to maximal two days
 - 3.2 Create new branch for every issue
 - 3.3 Write tests for functions and/or properties in reference to the given issue
4. Use one or more testing styles of your choice like...
 - 4.1 unit-tests (two tests per function)
 - 4.1.1 Use jest for that purpose
 - 4.2 property-based-tests (test functions with properties, every function occurs at least once)
 - 4.2.1 Evaluate at least once a month if an additional pbt makes sense.
 - 4.3 user-interaction tests via puppeteer
5. Merge code after every finished, reviewed as well as tested issue
 - 5.1 Create pull-request
 - 5.2 Other developer should review code and then merge the pull request if ok otherwise refactor.
